

GENERAL NATIONAL PLAN_INFRASTRUCTURE SYSTEM_ENERGY - INDUSTRY

AKPT
AGJENCIA KOMBETARE E
PLANIFIKIMIT TE TERRITORIT

- Principles**
- Diversification toward renewable energy;
 - Unification of energy corridors with those of transport infrastructure, where it is feasible;
- Priorities**
- Improving electricity supply in the whole region of the country, with focus on the primary functional economic areas.
 - Strengthening the network of electricity supply within the existing and proposed seaports;
 - Strengthening the network of electricity supply that will serve the special employment groups, considering the demands from the processing industrial areas, with a particular focus on the areas known as free economic zones.
- Strategic projects include:**
- TAP - completion of the Trans-Adriatic Pipeline project;
 - IAP - completion of the Ionian-Adriatic Pipeline project, which will pass in the western part of Albania, from Fier to Shkodra and then Montenegro with two branches, one in Ulcinj and the other one in Podgorica;
 - IAP - KOSOVO, carrying out the gasification project of Kosovo from Albania, thus completing the Western Balkan Ring (WBR);
 - The gasification of 7 regional development poles of the country. This strategic project emanates from the polycentric development of Albania. It has started to be implemented with the development of the Gas Master Plan, initiated by the Ministry of Energy and Industry;
 - Feasibility study on the possibility to reactivate the existing thermal power plants operating with gas;
 - Feasibility study on making efficient the areas with a priority on mineral extraction and processing;
 - Feasibility study on the possibility to reactivate the existing thermal power plants operating with gas;
 - Feasibility study on making efficient the areas with a priority on mineral extraction and processing;

- LEGEND**
- | | |
|--------------------------------------|---|
| Administrative border | Non - metal deposit |
| Energy port | Proposed thermal plant |
| Airport | Inactive thermal plant |
| Hydroenergy | Biomass power plant |
| Main hydropower plants | Gas infrastructure |
| Small hydropower plants | Gas line (MoEl) |
| 110 kV lines | Gas line Tirana - Dibra (GNP) |
| 220 kV lines | Gas bearing fields |
| 400 kV lines | Gas compressor |
| Reinforcement of lines | Oil infrastructure |
| Alternative energy | AMBO line |
| Area rich in mineral resources | Oil refinery |
| Steel-nickel deposit | Oil bearing fields |
| Active teel-nickel mine | Areas of oil and gas deposits and research blocks |
| Closed steel-nickel mine | Solar energy (quantity of sunny hours) |
| Steel-nickel mine under construction | < 2100 |
| Copper deposit | 2100 - 2300 |
| Copper mine | 2300 - 2500 |
| Copper enrichment factory | 2500 - 2700 |
| Chrome deposit | > 2700 |
| Active chrome mine | Wind energy |
| Closed chrome mine | 3000 - 4500 |
| Chrome mine under study | 4500 - 5250 |
| Chrome enrichment factory | Eolic park |
| Bitumen mine | Geothermal energy |
| Bitumen melting furnace | <0.25 GJ/m2 |
| Coal deposit | 0.25 - 0.50 GJ/m2 |
| | 20-40 GJ/m2 |
| | Geothermal resources |
