BRIGAIID PROJECT MEETING

TIRANA (ALBANIA)

The Afternoon with BRIGAIID Actors in Albania – Huddling Together for Climate workshop was organized on October 23th, with Mrs. Adelina Greca, Director of National Territory Planning Agency, thanking the leaders and partners of the project for their support and their presence in Albania. The participants included the Ambassador of Netherlands in Albania, Mrs. Guusje Korthals Altes, representatives of donors in Albania that deal with climate change such as GIZ and UNDP, as well as actors and collaborators of the project – all of them discussing about climate change and their issues, under the light of innovations and their further development.

WORKSHOPS

OCTOBER 23rd

The purpose of the workshop was to emphasise the scope of BRIGAIID and its pathway on supporting research and innovation on climate changes. Representatives of the project leader and partners shared best examples, introduced the main pillar of BRIGAIID and their vision of BRIGAIID's future.

INNOVATION FAIR

OCTOBER 24TH

The Innovation Fair was organized on October 24th, displaying national and international innovations supported by BRIGAIID. The Ambassador of Netherlands in Albania and leaders of BRIGAIID congratulated the participants for their excellent work.

FIELD SURVEY

OCTOBER 25TH

1) Flood planting at Erzeni river Innovator *Polis University*

This innovation is based on the alternative method of applying Coir logs and planting vegetation along the riverbank.

2) GREENFIX f³ Fire Free Fibres Blankets Innovator *Al-Geosystem Company*

GREENFIX f³ combines all the benefits from all other GREENFIX products, as well as GREENFIX 75 and provides additional fire protection according to DIN 4102-1.

STUDENT TRAINING

"APPROACH TO LEARNING OUTSIDE AUDITORS ON FLOODS IN ALBANIA" 2017"

Finding new opportunities that relieve and assist people to successfully face natural disasters is the very core of BRIGAIID; that is the reason it is committed to carefully inspect and analyze the Albanian reality.

The field research focused on the affected population of Ishem, Erzen and Vjosa rivers.

It is necessary to increase awareness of local government bodies, decision-making authorities, associations and groups of interest, scientific and design institutions, and universities.

WORKSHOPS

MARCH 23rd

BRIGAIID/AKPT organized the workshop "BRIGAIID innovation and meteorology, or vice versa."

The purpose of organizing this workshop was to introduce the Albanian innovations which are already part of the BRIGAIID Project and to introduce the novelties of the Climate Innovation Window Platform to the participants.

BRIGAIID ALBANIA SECOND NATIONAL MEETING

JUNE 5TH

Several speeches and addresses on environmental issues and on the importance of innovations in the management, organization and functioning processes at national and local level were held at the meeting. The meeting offered an opportunity to show that innovations are a must solution for natural disaster management and for Universities to apply new methodologies in their curricula.

It ended with a voiced interest of participants to be part of the Project by introducing alternative solutions.

THREE FORUMS: FLOODING, DROUGHT AND EXTREME WEATHER CONDITIONS

DECEMBER 17TH, 19TH, AND 21ND

The participants included all twelve Albanian innovators that belong to the Project, in a face to face discussion with members of public institutions, agencies, and universities.

BRIGAIID ALBANIA FIRST NATIONAL MEETING FOR BUILDING BRIGAIID PROJECT STAKEHOLDERS'

Where and when:
21 April 2017 at Tirana, Albania.

Purpose:

The National Territorial Planning Agency organised the First National Meeting for building BRIGAIID project stakeholders' network, which will support and contribute in innovation ideas from the beginning till their implementation.

Who attended the event and why:
Thetis SPA.

DEFINING THE OPERATIONAL TEST SITE IN ALBANIA

Albania is classified as an operational test site in BRIGAIID project and thus, testing is expected to be a core activity for the Col.

NTPA is planning to organize testing/promotion activities for BRIGAIID innovation product in a potential test site in Albania.

Ideally, it is expected that these activities will be organized on behalf of BRIGAIID project and to be attended by: BRIGAIID partners, innovators, national end-users, companies, research units (public and private), universities representatives as well as students.

An important point will be promoting/marketing these test events. This will be undertaken by publishing the event in the NTPA's electronic platform and informing the current list of contacts about the agenda and the program. These events are intended to be livestreamed and this will be accompanied by other dissemination actions.

During 2016 there are three main subjects that were discussed:

1. PROBLEMATIC IDENTIFICATION
2. STAKEHOLDERS IDENTIFICATION
3. END-USER IDENTIFICATION

2016
